PROFILE

Senior React Native developer with 6+ years building and shipping production mobile applications in TypeScript. Experience spans large-scale consumer platforms serving 500K+ monthly active users and end-to-end ownership of a greenfield mobile app as the sole React Native engineer. Background in design and client-facing project work informs a practical approach to architecture, product detail, and delivery. I also use AI-assisted engineering workflows for code review, security auditing, and performance analysis.

TECHNICAL SKILLS

Mobile & Data: React Native, TypeScript, Expo, React Query, Zustand, SQLite, MMKV, MobX
Architecture & Platform: Feature-based modular architecture, offline-first, monorepos, OAuth / PKCE, Firebase, AWS
Testing & Delivery: Jest, React Native Testing Library, Maestro, Detox, SonarCloud, GitHub Actions, Fastlane
UI, Performance & AI: Reanimated, Skia, Hermes, React Native DevTools, Flipper, multi-agent engineering workflows

EXPERIENCE

Senior React Native Developer · Devoteam Creative Tech Oct 2024 - Present

Greenfield Fleet EV Charging Application - Major Portuguese Retail Group

- Sole React Native developer responsible for a greenfield mobile application from initial technical setup through its final delivery phase.
- Built the mobile architecture with Expo, TypeScript, React Query, Zustand, and SQLite, including offline-first flows and local persistence.
- Implemented OAuth PKCE authentication, map-based store flows, filtering, internationalization, offline queue behaviour, and automated quality checks with Jest, React Native Testing Library, Maestro, SonarCloud, and GitHub Actions.
- Used multi-agent AI workflows to support code review, performance checks, and security auditing.

EDP - Consumer Mobile Platform

- Contributed as part of a React Native team to building EDP's consumer app from scratch, consolidating energy, solar, EV charging, billing, and smart home services into a single platform; 500K+ monthly active users and Prémio Cinco Estrelas 2025.
- Worked on feature delivery, modular architecture, TypeScript, testing, complex mobile UI, and performance profiling with Flipper, React Native DevTools, and Hermes.

Senior React Native Consultant · Mind Source Jun 2021 - Oct 2024

- Developed Upreciate, a gamified employee engagement platform created with Rumos, covering feedback, missions, onboarding, and internal engagement flows.
- Worked across React Native, Vue.js, MobX, and AWS, contributing to architecture decisions and the technical evolution of the product as it expanded beyond its initial feedback flow.
- Mentored junior developers and facilitated Agile ceremonies across hybrid teams.

React Native Developer · Yeah Studio Sep 2019 - Jun 2021

- Developed a mobile application for Volkswagen Germany / Autoeuropa's factory workforce, supporting internal communication, HR information, and employee services.
- Helped replace a large PDF and spreadsheet-based transport workflow with a map experience for bus routes, nearby stops, and schedules.
- Owned the mobile release pipeline, including build automation and App Store / Play Store publishing, and integrated AWS services with a Symphony backend.

Designer & Project Consultant · DellAnno / Florense 2011 - 2016

- Worked on project planning, client relationships, sales support, and design delivery across architectural and interior design projects.

EDUCATION & LANGUAGES

Bachelor's studies in Informatics Engineering - final year reached; degree currently on hold **Portuguese:** Native

Polytechnic Institute of Setúbal · 2017 - On hold

Bachelor's in Design **English:** Upper-Intermediate (B2)

Estácio University, Rio de Janeiro · 2007 - 2010
